

Department of Electronics and Communication Engineering

The year 2020 has been very challenging in the world with the onset of pandemic Covid-19. However, these difficult situations of lockdown did not stop us from continuing our learning process. Various Webinars/Workshops were conducted during this pandemic for students/faculty/researchers to continue the teaching –learning process.

Our Alumni supported us in this situation and various webinars were organized during lockdown. The posters of the same are attached herewith for reference. The webinars were a huge success with over 100 participants in each one of them.

RCOEM
