Prof. Kaushik Roy, the Dean of the Career Development and Placement Cell (CDPC) at RCOEM, organized the event.
- The discussion focused on the leadership skills necessary in the cutthroat corporate environment of today. How effective leaders enlist empowerment and personal commitment to driving results was thoroughly explained by Mr. Kedar Gokhale. There were academic staff, research associates, and UG and PG students from RCOEM Nagpur. Anirudh Dutta is renowned for her high-impact, result-oriented leadership development programs and lectures on leading or recovering complicated, large-scale business and technology initiatives. He emphasized his support for strong teamwork, a digital mindset, and innovation that is fueled by expertise in order to achieve difficult goals. Anirudh Dutta - Head of Campus Recruitment and Relations, Cognizant. Kedar Gokhale is a Head power training at Tata Technologies.

#### 4) Infocepts' Technology Awareness Visit

- The co-ordinators of Career Development & Placement Cell visited the Infocepts Nagpur campus where they had interaction with their technical team along with their HR team.
- Students were briefed about the current trends in technologies and the niche skills which companies look for so that students can brief their respective batchmates. Students also got a chance to interact with the HR team and were told how they can develop the right attitude towards interviews.
- The technical team gave a very thorough presentation on the importance of Big Data, Business Intelligence and Data Science.

## 5. Career Prospects in Software Industry- By Prof. Kaushik Roy

- On September 27, 2022, at 2:00 PM, the Career Development and Placement Cell at Shri Ramdeobaba College of Engineering and Management organized a session by **Prof. Kaushik Roy**, Dean CDPC who is an eminent public speaker,
- This seminar was initiated by sir asking the students about their understanding of the skills required to make a career specialized in computer science. He expressed how the entire Career Development and Placement Cell team is focused on and working towards providing students with the job opportunities they demand and deserve.
- This brief introduction was followed by an in-depth analysis of the placement trends in each sector related to computer science. From Data Science, Artificial intelligence, and Machine learning to Cyber Security, all domains were covered. Sir thoroughly explained how each student could opt for a job career with their skill set and interests from these domains.

## 6. How to prepare for Campus Placement Drive session for MCA Students.

- On August 26, 2022, at 11:00 AM, the Career Development and Placement Cell in association with Masters of Computer Application (MCA) Department at Shri Ramdeobaba College of Engineering and Management organized a session by **Prof. Kaushik Roy**, Dean Career Development & Placement Cell
- The session began with Professor introducing himself, and the stressing on the need of understanding the fundamentals of communication skills and technical skills. Students were informed earlier to prepare one introduction and come prepared so that the session will not be monotonous.
- Firstly sir had given one brief explanation about how to develop communication skills, technical skills and also he used power point presentation for a clear picture of skills in student's mind. Secondly sir had given open chance to everyone to share their ideas and because of that, the session was interesting enough, and a special thanks to Prof Kaushik Sir and whole Career Development and Placement Cell (CDPC) for having the co-ordinators and that too knowledgeable and helping, as some students are shy or they are not confident that they can speak on stage so all co-ordinators are going to their places to overcome their shyness.

- Lastly, sir had explained about the requirements of companies, soft skill and technical skill, importance of mission and vision of a company, companies that visit to college for MCA students like TCS, Accenture, Eaton, Hexaware Technologies, etc.

## 8. Importance of Professional Communication Activity

On May 6, 2022, at 1:00 PM, the Career Development and Placement Cell in association with Electronics Department at Shri Ramdeobaba College of Engineering and Management organized a series of lectures by **Prof. Allan Abraham**, who is an eminent public speaker, and a Soft Skill trainer along with Corporate Relations & Placement officer at RCOEM.

The session began with Professor with enthusiasm and asked everyone to form a line. The fun activity was playing Chinese whisper. Initially, students were unaware about the significance of the activity, as they were pre-occupied with excitement and joy of playing Chinese whisper. Therefore, sir changed the question to “What was the most difficult task in that game?” A student stood up and answered, getting the message right to the receiver. And that’s when sir started his talk with significance of the game.

He introduced the lecture’s theme “Importance of proper communication.” If you want to make sure you always have the appropriate information and the other person feels heard, this can be crucial in real life. Most important aspect of communication is listening. He said that listening skills can assist you in navigating challenging conversation.
